

## Personalized Intelligence & Business Development Services

NanoGlobe specializes in Emerging Technologies with highly personalized & specialized

- Market, Business and Technology Intelligence
- Business Development Execution
- Strategic Partnership Creation
- Connecting to Government, Technology & Industry Networks

### Unique

Unparalleled understanding and on-the-ground intelligence of emerging technology related businesses

Providing highly personalized business development services to

- Corporations
- Entrepreneurs
- Governments
- Research institutions

### Expertise

- Advanced Materials (e.g. Nano Carbon and Its Applications, Composites, etc.)
- Battery Technologies
- Membranes Technologies (e.g. Water Filtration)
- Printed Electronics
- MEMS
- Photovoltaic
- Power Electronics
- More...

## Asia's Nanotech Ambassador

NanoGlobe was founded and is managed by Dr. Lerwen Liu, "Asia's Nanotech Ambassador." Dr. Liu is a well-known nanotechnology expert specializing in corporate and government strategy, business development, and market intelligence.

NanoGlobe has created an unparalleled business network, especially in the Asia Pacific Rim. Dr. Liu and her team of consultants, analysts and partners have been actively connecting nanotechnology leaders and driving nanotech businesses for more than 13 years.

*Promote Global and Sustainable Development and Adoption of Nanotechnology to Benefit Mankind*

# NanoGlobe Connects You to Partners & Opportunities Worldwide

- Industry Ecosystem Development Strategy
- Internationalization Strategy
- Technology Roadmapping

- International Business Development
- Industry Partnership
- IP Mapping

- Due Diligence
- Benchmarking
- Strategic Partnership

Multi National Companies

Governments

R&D Institutes

**NANO**GLOBE

SMEs/  
Startups

Investors

NanoGlobe HQ

- International Business Development
- Strategic Partnership

- Technology/Market Assessment
- Due Diligence

## NanoGlobe Events & Publications

**Bimonthly Workshop Series** on “Manufacturing Technologies for a Sustainable Society.” Topics include:

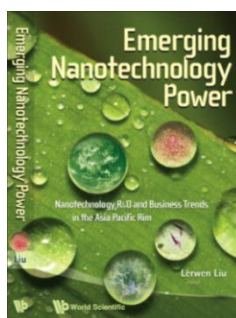

- Advanced Functional Materials
- Micro-&Nano-manufacturing Technologies
- Energy and Green Technologies
- Nano Medicine

NanoGlobe’s events promote and facilitate nanotech application development, partnerships and market access in China/Asia.

### Suzhou & Singapore Nanotech Capabilities Reports

- Covering nanotech ecosystem, including research institutes, universities, companies, start-ups, platforms, infrastructure & government incentives

*Do you need to understand the nanotechnology R&D and business trends in Asia Pacific Rim?*
